The first blockchain platform with the opportunity to create smart tokens in 3 clicks

Smart token - a token with a dynamic component smart contract created without programming

YOUR COIN 24H
$11,12 +9.23%

Problems and solutions

SOLUTION:

Free constructor that allows you to create your own smart token in a few minutes

PROBLEM:

A token and a smart contract creation require technical knowledge and a team of Blockchain developers. It makes tokenization inaccessible for most people and business
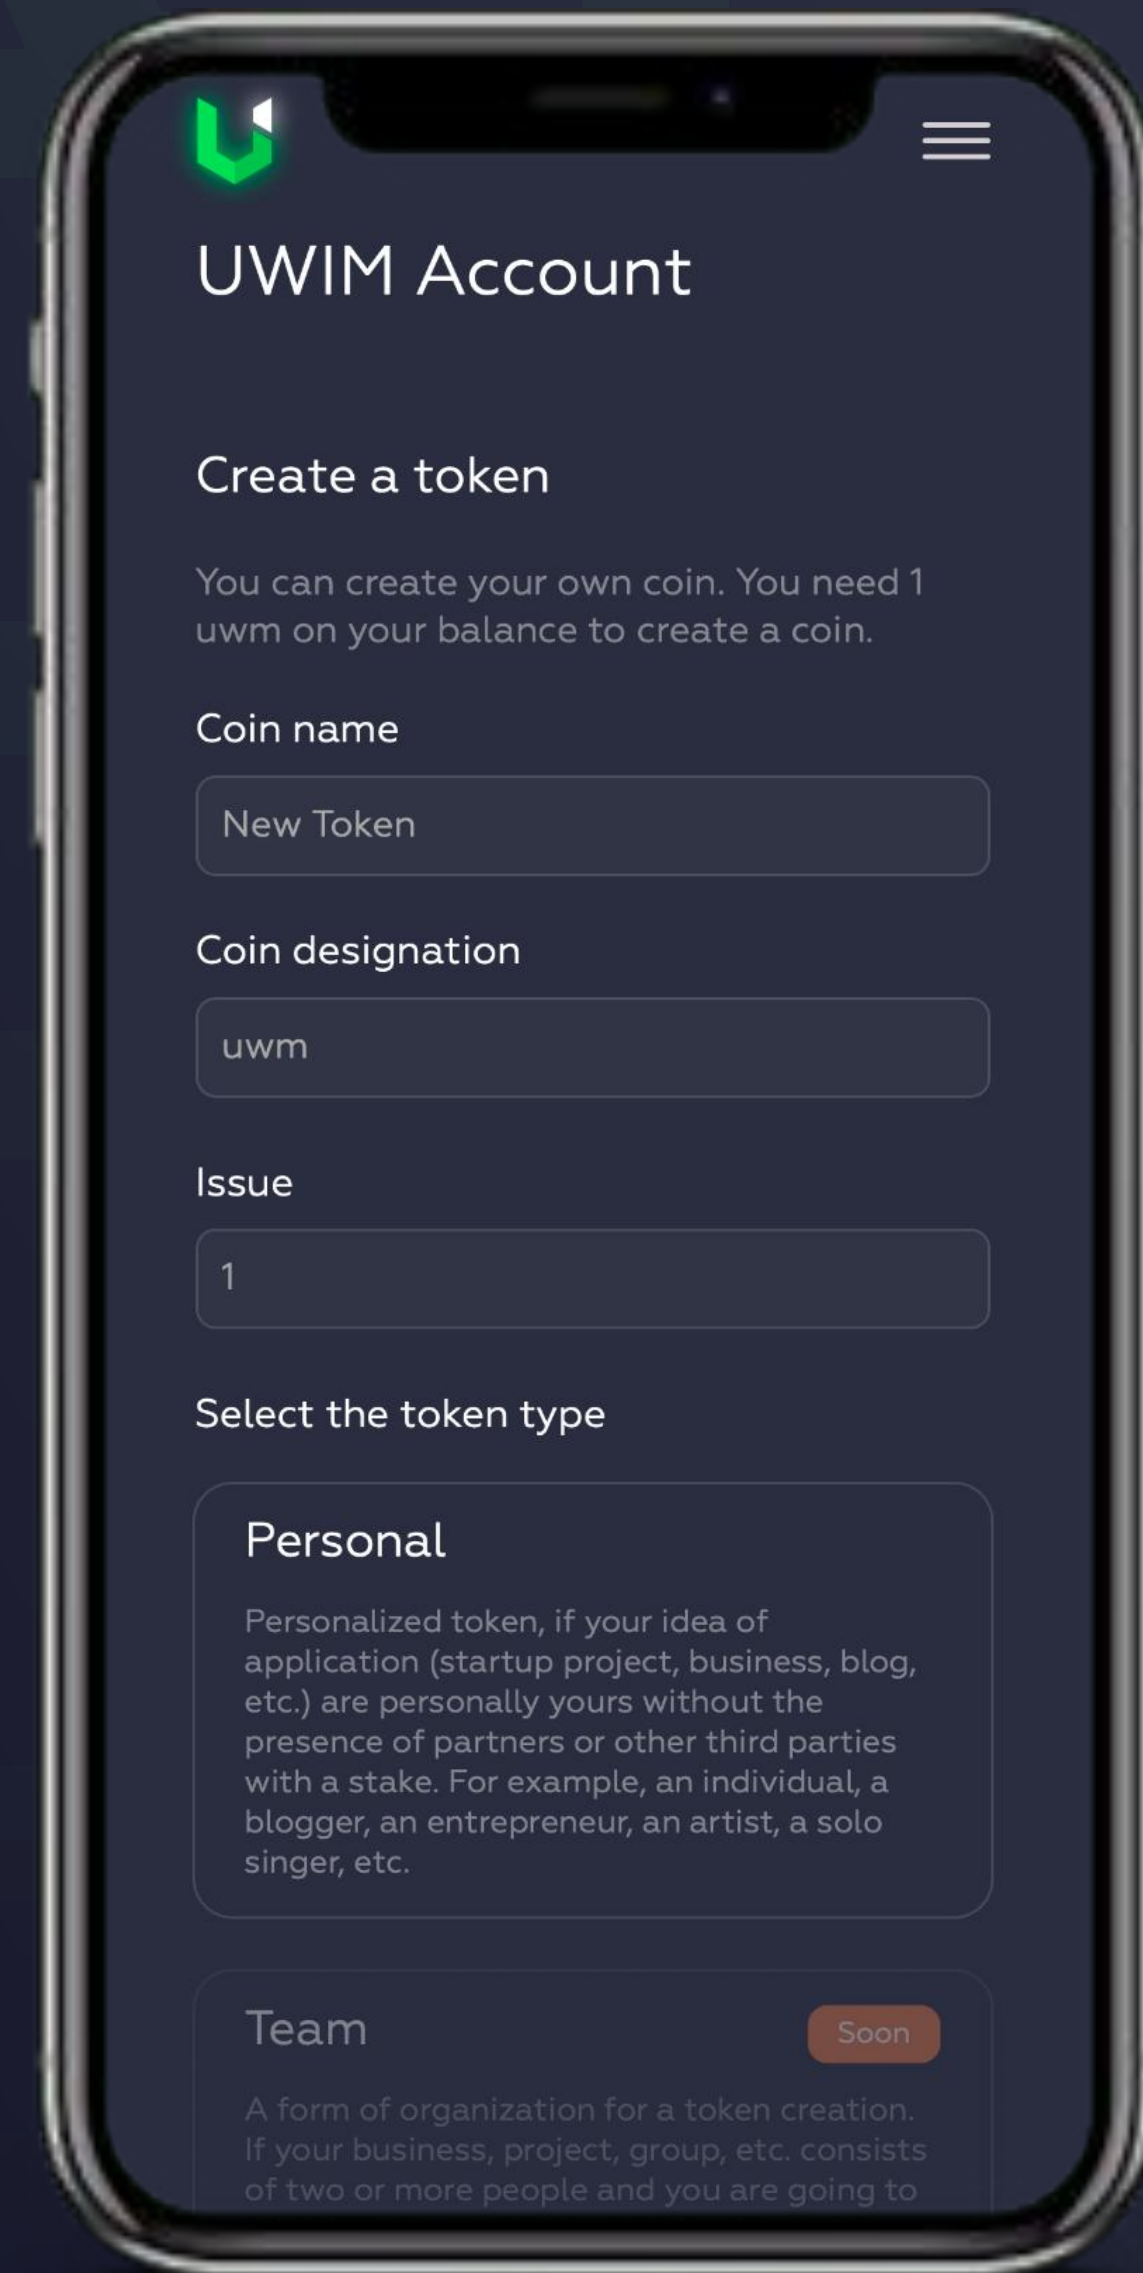

SOLUTION:

A smart token owner can use it due to an ecosystem of 13 products with a simple interface

Create tokens with a prepared smart contract in 3 clicks

UWIM – a Blockchain ecosystem with an intuitive interface, a constructor for tokens and smart contracts creation and a platform for project and people tokens popularization. Each product in the ecosystem will have 2 interfaces - simple and professional

UWIM Account

Create a token

You can create your own coin. You need 1 uwm on your balance to create a coin.

Coin name

New Token

Coin designation

uwm

Issue

1

Select the token type

Personal

Personalized token, if your idea of application (startup project, business, blog, etc.) are personally yours without the presence of partners or other third parties with a stake. For example, an individual, a blogger, an entrepreneur, an artist, a solo singer, etc.

Team   Soon

A form of organization for a token creation. If your business, project, group, etc. consists of two or more people and you are going to

3

ABOUT UWIM

The smart token is a token with an opportunity to choose a prepared smart contract

Standards:

|				
MY	BUSINESS	STARTUP	DONATE	TRADE
NFT	NFT RENT	GUILD	GUILD TREASURY	GAME BOX

A smart token creator can supplement the smart contract (standard) in the future.

ABOUT UWIM

UWM Coin - The main unit for all operations on the platform. The number of UWMs is limited.

UWIM is Australian blockchain company
(UWIM BLOCKCHAIN PTY LTD ACN 649 428 240)

UWIM automates manual labor (Designing a contract, writing code, testing, auditing, uploading to the network).

UWIM provides an easy creation and use of a smart token.

Each product has 2 interface modes: simple and professional.

UWIM interacts with other blockchains (Crosschain with BSC and ETH).

Solution for building and connecting Ethereum-compatible blockchain networks

ABOUT UWM COIN

UWIM coin – a platform token that is used in all operations in the
UWIM ecosystem

DEX
Each token is traded coupled with UWM on the DEX exchange

FEE
All platform fees are carried out in the form of UWM

NFT MARKETPLACE
NFT can be bought for UWM in the UWIM network

DONATES
Donates can be sent for UWM

LAUNCHPAD
Investments in projects on Launchpad are accepted in UWM

CONSTRUCTOR
It is required to have a UWM to create a token

CONTRACT STORE
Placement and purchase of contracts are carried out in UWM

DAO
Voting is implemented for UWM

According to statistics, coins related to the concept of "Platform token" are less subject to
fluctuations in the market because they are involved in all platform operations. The growth in the
value of UWM will be primarily influenced by the number of users and the ecosystem popularity.

6

ACCREDITATION OF USER TOKENS

— Accreditation protects against skam tokens

— Users can see which token is verified

— The token owner can receive the data confirmation by providing
personal data of them or their company. The data is checked for a
fee manually.

SMART CONTRACT STORE

— Developers can make own smart contract for UWIM Blockchain and share or sale it on Smart Contract Store

— Developers can create and add smart contracts for other blockchains (Binance smart chain, ethereum, solana, polygon)

— Every user can buy and use Smart Contracts from UWIM Store

ROADMAP

2019-2020: ⟶

Q4 2019

- Idea generation, team building
- MVP blockchain development and UWIM test network v 0.0.1 launch
- Start of the Seed stage

Q1 2020

- Development and testing of UWIM Wallet (Universal web wallet for UWM coins storage and use)
- Development and testing of UWIM Explorer (UWIM blockchain explorer that allows checking any event on the network)

Q2 2020

- Development and testing of UWIM Stacking - Affiliate program for the AirDrop and early access stage
- The first version of the project's official website creation
- The main project network and the uwim.io website launch, the start of primary early access, the UWIM Stacking system launch
- Start of the Pre-sale stage

Q3-Q4 2020

- Refinement of the UWIM network core
- Development of a network platform for UWIM DAPPS (decentralized applications) creation

ROADMAP:

2021: ⟶

✅ Q1 2021

- Global network upgrade to the new stable version of UWIM v1.0.0
- Launch of UWIM DAPPS in the testnet, beta testing
- Completion of the first network era

✅ Q2 2021

- The platform opens the opportunity to create basic user tokens
- The first system smart contracts are added to the platform for the exchange of tokens and delegation
- Mobile application - Launch of UWIM Wallet Mobile - a mobile application for easy access to the wallet. Available for Android
- The first version of the UWIM user token platform launch with changes record in the blockchain

✅ Q3 2021

- Launch of constructors for creating tokens and smart contracts on the site
- Updating the user interface Wallet, Mobile
- Development of a new type of NFT Token
- Launching the DEFI exchange of UWIM tokens

✅ Q4 2021

- Updating the interface of the mobile application
- Launching the Private Sale stage
- Updating the interfaces of the main site, Wallet, Explorer
- Release of libraries for working with UWIM Node
- Opening the possibility of creating NFT-tokens in the network
- DEFI update
- Completion of the second era of the network, Genesis will complete the main stage of reward for block formation and the mechanism of transition to the accepted tokenomics will be launched
- Launch of contracts of a lock, fund , the eco-system contract
- Launch of sales of allocations on platforms
- Creation and testing of bridges with Ethereum, Binance SC

ROADMAP:

2022: ⟶

Q1 2022

- Launching the Public Sale stage, IDO
- Launching bridges with Ethereum, Binance SC
- Burning unallocated tokens
- Wallet: Launching a multi-currency DEFI solution with Uniswap connection, Pancake
- Explorer: Launching Explorer API with commercial packages
- Advanced token creation mode, launch standard StartUp, DAO contracts, Payable
- DEFI: DEFI contract will be available from mobile app

Q2 2022

- Listings on centralized exchanges
- Wallet: Upgrade with non-custodial mode
- DEFI: Derivatives trading
- Tokens: Additions of accreditation mechanism
- Votes: Forum for discussion and new interface
- Donates: Donate platform with transactions through the site
- Payments: Solution for projects with payment in tokens
- Payments: Solution for projects with payment of UWM
- NFT: Platform for the initial sale of NFT
- LaunchPad: Launch of UWIM LaunchPad based on the StartUp contract
- Education: Separate platform with regular training events

Q3 2022

- Wallet: Commercial version of hardware cold wallets
- Tokens: Opportunities for promoting tokens on the platform
- Tokens: Built-in audit of platform token and token standards
- Votes: Adding a token voting mechanism
- Donates: Donate mechanics via QR code and browser extension
- Payments : Update with express transactions
- NFT: Integration of secondary sale with DEFI
- LaunchPad: Integration with the UWIM Foundation
- Fund: Launch

Q4 2022

- Donates: Integration with popular streaming platforms
- Developers: UBD open platform for business
- Formation of the expert commission of the fund
- Fund: Launch of the first projects for receiving grants in tokens

Team | Co-founders & Advisors

Pavel Entin

25 years of experience ranging from CFO of multibillion-dollar corporations to investment banker, generating over $ 300M profit for clients in transactions and over $ 1B in placements.

International experience of doing business and transactions in more than 15 countries, 3 IPOs, 1 ICOs and a number of private placements, Ph.D. in Economics, Russian University of Cooperation.

Dmitry Fedotov

COO of BC VAULT, manufacturer of next-generation crypto hardware wallets.

Dmitry is a graduate of the Stanford School for Corporate Executives and the Stanford College of Directors. Work experience in companies specializing in artificial intelligence, autonomous transport, 3D production and digital distribution.

Ilya Filinykh

Over 15 years of experience in IT, investment and business. He founded 5 companies on three different continents. Experience in project management from concept to completion. Experience in the development of innovative business models and strategies for success. He has a master's degree in computer science and economics from the Russian Technological University and the Institute of Communication Technologies

Team

The project team consists of entrepreneurs - owners of international companies from the following spheres: Internet technologies, game industry.

+7 Core Developers

+3 Marketing Assistants

+3 Business Developers

Bikbaev Sam
CEO

Serial entrepreneur in IT, manufacturing since 2010

Dima Meru
CTO

IT development experience since 2010 Fintech development: since 2017

Kobtsev Roman
CMO

Internet marketing experience since 2009. Moderator of international chats about blockchain technologies

Vlasenko Anton
CFO

Web development specialist in the field of finance and analytics

Timofeyev Alex
Content Lead

Fintech marketing experience, fintech copywriter

Akhmetshin Marat
Frontman

Negotiation and work experience with mass media

Skomoroshchenko Alex CAO

IDO Launchpad Specialist

Martin
Team Builder

Just the dog
